AI-ONLY PERSONAL BRAND

A personal brand. Built only with AI.

I am building my personal brand with AI-generated video only – my face, Higgsfield models, published daily across Instagram, TikTok and YouTube. The videos are generated by an AI agent through your API, not by hand in the browser.

450
videos per month to start, 900 within 1–2 months

3
jobs in parallel

3
models: Genjutsu, Seedance 2.5, Katana

What I need

- **Unlimited (or a large fixed volume)** for Genjutsu and Seedance 2.5, plus Katana
- **Usable through your API / MCP** – the generations are run by an AI agent
- **At least 3 jobs in parallel** (15–30 videos a day)
- 720p or higher, clips up to 15 seconds
- Start month to month, with the 900 tier price fixed today

My questions

- **Is there an unlimited or volume deal for the API** – not only for the website plan?
- **Are Genjutsu, Katana and Seedance 2.5 available through the API?**
- **May I use the API in my own software, where users enter their own Higgsfield key?**
- What is the monthly price at ~450 and at ~900 videos – and can I upgrade mid-term without a new contract?
- Is there a fair-use limit? Which resolutions and durations are included?
- How fast can it be set up? I want to start on 19 October.

NEXT STEP

A written offer for API access with unlimited or volume pricing.

THE BIGGER PICTURE

Our own studio. Powered by Higgsfield.

My team creates content directly in our own platform. It runs on your models through the API and publishes straight to our social accounts. Later, we want to open the same platform to other creators – and say openly that it is powered by Higgsfield.

01
Idea or reference
A trend reel, an idea or a script

02
Prompt
An AI writes the prompt, the team checks it

03 · HIGGSFIELD API

Views and followers per video, back in the platform

OPTION A · WHAT I WANT

Unlimited API for our platform

- **Unlimited (or high-volume) API pricing** for Seedance 2.5, Genjutsu and Katana
- Our team generates and posts from one place – no manual work in the browser
- **Permission to offer the platform to other creators**, either with their own Higgsfield key or through our account
- Clear branding on every screen:

POWERED BY HIGGSFIELD

OPTION B · FALLBACK

Unlimited on higgsfield.ai

- Unlimited for **Seedance 2.5, Genjutsu and Katana**
- At minimum: **Genjutsu and Seedance 2.5**
- Our team works directly on higgsfield.ai, and we post the videos ourselves

More API volume
450 videos a month to start, 900 within 1–2 months – from our team alone.

New Higgsfield users
Every creator on our platform generates with your models.

Visibility
"Powered by Higgsfield" in the product and in a personal brand built only with AI.

WHAT I AM ASKING FOR

Option A if possible – Option B as the minimum.

HOW WE WOULD WORK TOGETHER

Two steps. First our team, then other creators.

Other creators should not run on our unlimited plan. That would break fair use and put our account at risk. So we suggest two separate agreements.

STEP 1 · NOW

Unlimited deal for our team

- One Higgsfield account and API key, used **only by our own team**
- Unlimited for Seedance 2.5, Genjutsu and Katana
- Our team creates and posts every day through CLIPPERZ
- 450 videos a month to start, 900 within 1–2 months

STEP 2 · AFTER LAUNCH

Reseller agreement for other creators

- We open CLIPPERZ to other creators, **"Powered by Higgsfield"**
- Their usage runs on **sub-accounts or reseller pricing**, separate from our unlimited plan
- We buy volume from you and bill our customers
- Alternatively, creators connect their own Higgsfield key

OUR TEAM
Our API key
Unlimited plan · Step 1

HIGGSFIELD
Two separate pools
Our usage and customer usage never mix

OTHER CREATORS
Sub-accounts or reseller pricing
Billed separately · Step 2

Questions about Step 2

- Do you offer a **reseller or partner agreement** for platforms built on your API?
- Can we create **sub-accounts or separate API keys** for our customers, with usage billed to us?
- What volume pricing or margin would a reseller get?
- Are there rules for using the **"Powered by Higgsfield"** name and logo?

WHAT I AM ASKING FOR TODAY

Step 1 now. Step 2 as a written option once CLIPPERZ is live.
